PROFESSIONAL SUMMARY

Software Engineer with experience in **AI, full-stack development, and LLM-powered applications**. Skilled in developing scalable web applications, REST APIs, Retrieval-Augmented Generation (RAG) systems, and AI workflows using modern JavaScript/TypeScript and Python ecosystems. Focused on building reliable, production-ready software.

EDUCATION

Bahauddin Zakariya University, Multan
BS Computer Science

Sept 2022 – June 2026
CGPA: 3.88/4.00

EXPERIENCE

Artificial Intelligence Developer Intern
Texense, Lahore

July 2025

Developed AI/ML solutions including classification and prediction models, multimodal RAG chatbots, and document processing applications. Worked with SQL for query optimization and gained exposure to .NET and Entity Framework.

AI and Data Analysis Affairs Intern
NYLP

August 2025

Engineered machine learning workflows involving statistical modeling, data preprocessing, and AI-driven analytics for intelligent systems. Strengthened model evaluation, documentation, and problem-solving skills.

PROJECTS

Chatbot using RAG with LangChain and Ollama Embeddings

- Developed a Retrieval-Augmented Generation (RAG) chatbot using LangChain and Ollama embeddings for context-aware response generation.
- Implemented vector search with ChromaDB and LLM-based pipelines for embedding, retrieval, and response generation in a Python backend with an interactive frontend.

Harbor (Health Analytics, Rescue Backup & Operations Routing) - Final Year Project

- Full-stack healthcare platform using React, TypeScript, Node.js, Express.js, PostgreSQL (Neon), Drizzle ORM, Zod, Tailwind CSS, with modular REST APIs, type-safe validation, and role-based architecture.
- MCP-based multi-agent AI system with Gemini Groq LLM integration, Google Places API, JWT authentication, bcrypt, RBAC, and event-driven orchestration for AI-powered healthcare decision support.

CERTIFICATIONS / COURSES

Data Analyst Associate Certification

DataCamp

- Passed both the **DA101 (timed)** and **DA501P (practical)** certification exams, demonstrating proficiency in SQL, data analysis, and data-driven decision making.

Develop Generative AI Solutions with Azure OpenAI in Foundry Models

Microsoft Learn

- Completed a 3-module learning path covering Azure OpenAI, generative AI models, prompt engineering, and application development using Azure SDKs.

ACHIEVEMENTS

- Gold Medalist** – Topper of the Batch (2022–2026) in BS Computer Science with a **CGPA of 3.88/4.00** at **Bahauddin Zakariya University, Multan, Pakistan**.

TECHNICAL SKILLS & INTERESTS

- Technical Skills:** Python, SQL, JavaScript, TypeScript, React.js, Node.js, Express.js, PostgreSQL, REST APIs, LangChain, RAG, Embeddings, Tokenization, LLM Integration, Prompt Engineering, Scikit-learn, Pandas, NumPy, Flask, ChromaDB, FAISS, Docker, Git/GitHub, MCP (Model Context Protocol), CI/CD, Postman.
- Interests:** Full-Stack Development, Artificial Intelligence, Generative AI, LLM-based Applications, Data Analysis, Scalable Web Applications, Software Development.
